About This Game

Exurgo is rogue-lite shooter built exclusively for Virtual Reality Headsets

Earth has been betrayed by its alien benefactors. Their gift to humanity, a monolithic space elevator known as the Spire, was a trap. Hopelessly outgunned, Earth's only chance is to turn the alien's weapons against them. Your mission: take control of an enemy assault bot, fight your way up the Spire and activate its self-destruct.

KEY FEATURES

- **Endless Replayability** - The Spire has hundreds of thousands of floors, each procedurally generated using a variety of algorithms for different level types.
- **Mod-able Weapons** - Collect hundreds of different power-ups that combine into millions of unique load-outs.
- **Omni-Hook** - Use this tool to collect power-ups, disarm shields, grab enemies or dash around the environment.
- **Permadeath** - Death sends you back to the ground floor, losing everything you collected on your ascent.
- **Progressive Skill Tree** - After each death, use the Fabricator to permanently enhance your bot with powerful skills and upgrades.

-
- VR Optimized User Interface - Change your load-out using a seamless in-world UI that never breaks immersion.
 - Free Locomotion - Traverse the game world using touch-pads or joysticks.
